## SUMMARY

---

Clinical Research Coordinator with 4+ years of experience supporting Phase II–IV industry-sponsored clinical trials from study start-up through close-out in GCP-regulated environments. I am experienced in protocol implementation, informed consent, participant screening, investigational product accountability, regulatory documentation, monitoring visit preparation, query resolution, and maintaining inspection-ready study records. Proven ability to collaborate with Principal Investigators, sponsors, Clinical Research Associates (CRAs), and multidisciplinary clinical teams to ensure protocol compliance, data integrity, and participant safety. I hold a Master of Public Health in Epidemiology and Biostatistics, Certified in Public Health (CPH), and a Bachelor of Dental Surgery, combining strong clinical knowledge with expertise in research operations, regulatory compliance, and clinical data management.

## EDUCATION

---

### **Masters in Public Health, Epidemiology & Biostatistics (GPA: 3.7/4)**

*August 2023 – December 2025*

*University of North Texas Health Science Center (USA)*

*President's Scholarship Awardee*

### **Bachelors in Dental Surgery (GPA: 4/4)**

*August 2017 – November 2022*

*Sharad Pawar Dental College, Datta Meghe Institute of Medical Sciences (India), Graduated with 8 honors*

## PROFESSIONAL EXPERIENCE

---

### **Clinical Research Coordinator**

*February 2026 – July 2026*

*Southern Endocrinology Associates PA, Mesquite*

- Coordinate **9+ active Phase II–IV industry-sponsored clinical trials** in collaboration with Principal Investigators, sponsors, and multidisciplinary clinical teams, ensuring compliance with ICH-GCP, FDA regulations, IRB requirements, sponsor protocols, and institutional SOPs.
- Implement study protocols from participant screening through study completion by conducting eligibility assessments, obtaining informed consent, coordinating study visits, maintaining source documentation, and performing protocol-driven data collection for **50+ study participants** while safeguarding participant safety, rights, and confidentiality.
- Performed phlebotomy, ECG collection, and IV placement/administration to support protocol-required safety labs, vital sign monitoring, and study procedures.
- Performed and coordinated ophthalmic study procedures — including visual acuity testing, funduscopy, Optical Coherence Tomography (OCT), and fluorescein angiography (FA) — for participant screening and follow-up visits, and coordinated intravitreal injection visits in accordance with study protocols.
- Prepare and maintain inspection-ready Investigator Site Files (ISFs), regulatory binders, delegation logs, training records, essential documents, and study correspondence to support ongoing regulatory compliance and monitoring readiness.
- Collaborate directly with sponsor Clinical Research Associates (CRAs) during **35+ qualification**, interim monitoring, and close-out visits by preparing study documentation, resolving follow-up items, responding to monitoring findings, and ensuring timely completion of action items.
- Review source documentation for completeness and accuracy, perform quality control of study records, **resolve 400+ EDC queries**, and maintain data integrity through timely documentation and discrepancy resolution.
- Coordinate investigational product accountability activities, including receipt, storage, temperature monitoring, dispensing documentation, inventory reconciliation, return, and destruction records in accordance with sponsor requirements.
- Identify, document, and assist in the management of protocol deviations, adverse events, concomitant medications, and safety documentation while supporting regulatory reporting requirements.
- Serve as the primary site liaison between investigators, sponsors, Clinical Research Associates (CRAs), central laboratories, pharmacies, vendors, and study participants to ensure efficient study execution and timely issue resolution.
- Support sponsor audits, monitoring visits, and regulatory inspections by maintaining complete, accurate, and inspection-ready study documentation while ensuring continuous compliance with ICH-GCP and sponsor requirements.

### **Research Coordinator**

*January 2025 – December 2025*

*South central Partnership for Energy Efficiency as a Resource (SPEER)*

- Coordinated multiple research projects simultaneously by managing timelines, deliverables, documentation, and stakeholder communication across multidisciplinary teams.
- Conducted protocol-driven literature reviews, data abstraction, quality assurance, and evidence synthesis to support public health research and policy initiatives.
- Collected, validated, and analyzed quantitative and qualitative data to ensure accuracy, consistency, and completeness for technical reports and organizational deliverables.
- Developed standardized research documentation, technical reports, and educational resources while maintaining version control and

documentation quality.

- Collaborated with internal leadership, external stakeholders, and subject matter experts to coordinate project activities and support timely completion of research milestones.
- Prepared scientific summaries, policy briefs, and peer-reviewed technical publications by translating complex research findings into clear, evidence-based recommendations.
- Performed regulatory and legislative reviews to evaluate evolving federal and state policies and support organizational strategic planning.
- Supported quality improvement initiatives through data analysis, process evaluation, and development of standardized research workflows.

#### **Graduate Research Assistant**

*January 2024 – December 2025*

*Maternal & Child Health Department, University of North Texas Health Science Center*

- Coordinated clinical and public health research activities by supporting protocol implementation, project timelines, participant tracking, and multidisciplinary collaboration across maternal and child health studies.
- Performed protocol-driven data abstraction, validation, and quality assurance for maternal mortality and morbidity research using MMRIA, CDC, and Texas Department of State Health Services (DSHS) datasets.
- Managed and analyzed large epidemiologic datasets using SAS, R, REDCap, and Microsoft Excel while ensuring data integrity, completeness, and compliance with institutional research standards.
- Developed and maintained research documentation, data collection instruments, case report forms (CRFs), tracking logs, and study records to support standardized data management practices.
- Conducted comprehensive literature reviews and synthesized scientific evidence to support study design, research protocols, grant activities, and manuscript development.
- Collaborated with faculty investigators, clinicians, epidemiologists, and multidisciplinary research teams to ensure timely project execution, regulatory compliance, and completion of research milestones.
- Performed quality control reviews, discrepancy resolution, and routine data verification to improve dataset accuracy and support reliable statistical analyses.
- Prepared technical reports, research summaries, presentations, and data visualizations to communicate findings to investigators, academic collaborators, and public health stakeholders.
- Supported compliance with institutional policies, HIPAA requirements, and ethical research standards while maintaining confidentiality of participant and research data.
- Contributed to epidemiologic analyses evaluating maternal health outcomes, risk factors, and health disparities to inform evidence-based public health interventions and policy recommendations.

#### **Public Health Intern**

*June 2024 – November 2024*

*Internal Medicine and Geriatrics, University of North Texas Health Science Center*

- Supported clinical and public health research activities by coordinating project implementation, participant engagement, and protocol-driven data collection across multidisciplinary initiatives.
- Assisted with participant recruitment, scheduling, follow-up, and retention while ensuring accurate documentation and adherence to established research protocols.
- Collected, verified, and managed research data using standardized data collection instruments while maintaining data quality, completeness, and confidentiality.
- Conducted literature reviews and evidence synthesis to support study development, quality improvement initiatives, and public health research projects.
- Developed educational materials, survey instruments, and assessment tools to support patient-centered interventions and research activities.
- Collaborated with investigators, faculty, clinicians, and interdisciplinary teams to coordinate research activities, monitor project progress, and achieve study milestones.
- Performed quality assurance reviews of research documentation and datasets to identify discrepancies and maintain data integrity.
- Assisted in preparing technical reports, presentations, and research summaries by translating scientific findings into evidence-based recommendations.
- Maintained compliance with institutional research policies, HIPAA requirements, and ethical standards governing human subjects research.
- Contributed to health promotion initiatives focused on geriatric care, Alzheimer's disease, mental health, and interdisciplinary healthcare education.

#### **Graduate Research Assistant**

*November 2023 – January 2024*

*Department of Infectious Diseases, Tarrant County Public Health*

- Conducted standardized data collection, validation, and documentation for epidemiologic surveillance in accordance with monitoring and quality assurance requirements
- Organized and validated surveillance datasets to support trend monitoring, discrepancy resolution, and reporting of local disease patterns

- Developed structured work plans and timelines to align surveillance activities with program objectives, milestones, and reporting requirements
- Supported preparation and review of technical reports, educational materials, and internal documentation for stakeholders.

### Clinical Research Coordinator

January 2019 – November 2022

*Datta Meghe Medical Hospital, Datta Meghe Institute of Medical Sciences & Research*

- Coordinated 15+ active Phase II–IV industry-sponsored clinical trials in endocrinology, ophthalmology, sleep medicine, general medicine in collaboration with Principal Investigators, sponsors, and multidisciplinary clinical teams, ensuring compliance with ICH-GCP, CDSCO regulations (New Drugs and Clinical Trials Rules, 2019), Institutional Ethics Committee (IEC) requirements, sponsor protocols, and institutional SOPs.
- Implemented study protocols from participant screening through study completion by conducting eligibility assessments, obtaining informed consent, coordinating study visits, maintaining source documentation, and performing protocol-driven data collection for 200+ study participants while safeguarding participant safety, rights, and confidentiality.
- Performed phlebotomy, vital sign monitoring, ECG collection, and IV placement/administration to support protocol-required safety labs and study procedures.
- Performed and coordinated ophthalmic study procedures, including visual acuity testing, funduscopy, Optical Coherence Tomography (OCT), and fluorescein angiography (FA), for participant screening and follow-up visits, and coordinated intravitreal injection visits in accordance with study protocols.
- Conducted and coordinated procedures for sleep apnea clinical studies, including sleep study assessments and visit coordination in accordance with protocol requirements.
- Prepared and maintained inspection-ready Investigator Site Files (ISFs), regulatory binders, delegation logs, training records, essential documents, and study correspondence to support ongoing regulatory compliance and monitoring readiness.
- Collaborated directly with sponsor Clinical Research Associates (CRAs) during qualification, interim monitoring, and close-out visits by preparing study documentation, resolving follow-up items, responding to monitoring findings, and ensuring timely completion of action items.
- Reviewed source documentation for completeness and accuracy, performed quality control of study records, resolved EDC queries, and maintained data integrity through timely documentation and discrepancy resolution.
- Coordinated investigational product (IP) accountability activities, including receipt, storage, temperature monitoring, dispensing documentation, inventory reconciliation, return, and destruction records in accordance with sponsor requirements.
- Identified, documented, and assisted in the management of protocol deviations, adverse events (AEs/SAEs), concomitant medications, and safety documentation while supporting regulatory reporting to the IEC and sponsor.
- Served as the primary site liaison between investigators, sponsors, CRAs, central laboratories, pharmacies, vendors, and study participants to ensure efficient study execution and timely issue resolution.
- Supported sponsor audits, monitoring visits, and regulatory inspections by maintaining complete, accurate, and inspection-ready study documentation while ensuring continuous compliance with ICH-GCP and sponsor requirements.

## CORE COMPETENCIES

---

- **Clinical Trial Operations:** Phase II–IV Clinical Trials, Clinical Trial Coordination, Study Start-Up, Study Conduct, Study Close-Out, Protocol Implementation, Protocol Compliance, Site Management, Clinical Trial Documentation
- **Ophthalmic Study Procedures:** Visual Acuity Testing, Funduscopy, OCT, Fluorescein Angiography, Intravitreal Injection Visit Coordination
- **Biospecimen Collection & Processing:** Phlebotomy, IV Placement/Access, ECG Collection, Specimen Handling & Shipping, Central Laboratory Coordination, Vital Signs, Laboratory Documentation
- **Monitoring & Site Management:** Monitoring Visit Preparation, Sponsor & CRA Collaboration, Site Qualification Visits (SQV) Support, Site Initiation Visit (SIV) Support, Interim Monitoring Visit (IMV) Support, Close-Out Visit (COV) Support, Monitoring Follow-up, Site Readiness

- **Regulatory & Compliance:** ICH-GCP, FDA Regulations, IRB Compliance, Human Subjects Protection, HIPAA Compliance, Essential Document Management, Investigator Site Files (ISF), Regulatory Binders, Regulatory Documentation, Audit & Inspection Readiness
- **Participant & Clinical Management:** Informed Consent Process, Participant Screening & Enrollment, Subject Recruitment & Retention, Medical History Review, Eligibility Assessment, Study Visit Coordination, Patient Education, Medical Record Review
- **Safety & Investigational Product Management:** Adverse Event (AE) Documentation, Serious Adverse Event (SAE) Reporting Support, Concomitant Medication Documentation, Protocol Deviations, CAPA Support, Investigational Product Accountability, Drug Dispensing Documentation, Temperature Log Management, Pharmacy Coordination
- **Data Management & Quality:** Source Documentation, Source Data Verification (SDV) Readiness, Electronic Data Capture (EDC), eSource Documentation, Case Report Forms (CRFs), Query Resolution, Data Entry, Data Validation, Data Integrity, Quality Assurance (QA), Quality Control (QC), Database Reconciliation
- **Laboratory & Clinical Procedures:** Biospecimen Collection & Processing, Specimen Handling & Shipping, Central Laboratory Coordination, ECG Collection, Vital Signs, Laboratory Documentation
- **Research & Project Management:** Clinical Research Coordination, Project Coordination, Timeline Management, Cross-functional Collaboration, Scientific Literature Review, Technical Writing, Scientific Reporting, Stakeholder Communication
- **Software & Technical Skills:** Epic EHR, REDCap, Medidata Rave, Florence eBinders, CTMS, Veeva Vault, SAS, R, Microsoft Office Suite (Excel, Word, PowerPoint), Adobe Acrobat

## LICENSES & CERTIFICATIONS

---

- **Certified in Public Health (CPH)** – National Board of Public Health Examiners (NBPHE), USA
- **Registered Dental Assistant (RDA)** – Texas State Board of Dental Examiners, USA (2025)
- **Integrated National Board of Dental Examiners** – American Dental Association, USA (2025)
- **General Dentist License** – Dental Council of India, Reg. No. A-52994 (2023)
- **Basic Life Support (BLS)** – USA (2024)
- **Advanced Clinical Life Support (ACLS)** – USA (2024)
- **Columbia Suicide Severity Rating Scale (C-SSRS)** – USA (2026)
- **Good Clinical Practice (GCP)** – USA (2026)
- **Policy Analysis in Public Health** – USA (2025)
- **Human Subjects Research** – USA (2024)
- **Graduate Student Research Assistant** – USA (2024)
- HPV-Associated Oral and Throat Cancer; Study Designs in Epidemiology; Biology of Cancer; Antimicrobial Resistance (Theory & Methods); Cancer Metastasis

## DENTAL EXPERIENCE

---

### Licensed Dental Surgeon | India; Registered Dental Assistant | USA

Licensed Dental Surgeon with over three years of clinical experience providing comprehensive patient care across outpatient, surgical, and community healthcare settings. Performed patient assessments, treatment planning, informed consent, and a wide range of clinical procedures while maintaining accurate medical documentation, infection prevention standards, and patient safety. Collaborated with multidisciplinary healthcare teams, interpreted diagnostic imaging, managed high patient volumes, and developed strong communication, critical thinking, and clinical decision-making skills that readily translated to regulated clinical research environments.

## VOLUNTEERING EXPERIENCE

---

Across 1,200 hours of volunteer and community service, contributed to dental and public health initiatives serving underserved, rural, and high-need populations in both India and the United States. Provided preventive care, screenings, oral hygiene education, and basic dental treatments through rural camps, school outreach programs, and COVID-19 response clinics. Strengthened commitment to equitable healthcare, compassionate communication, and service-oriented practice through direct patient interaction and community engagement.

### Data Analyst, Research & Healthcare

*July 2026 – Present*

#### *Community Dreams Foundation*

- Clean, validate, and analyze community health and program data using Excel, SQL, and R/Python to measure outreach impact and flag disparities in access to care among underserved populations.
- Build dashboards and visual reports in Tableau or Power BI that track program metrics (participation, service use, outcomes), helping leadership make data-driven decisions and report to funders.
- Apply epidemiological and biostatistical methods, such as descriptive statistics, trend analysis, and needs assessments, to find at-risk groups and support grant proposals and community health programs.
